Motorized Obsessions-Paul R. Josephson
2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal

and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Incandescent Alphabets-Annie G. Rogers
2018-06-12 Psychosis, an invasion of mind and
body from without, creates an enigma about
what is happening and thrusts the individual into
radical isolation. What are the subjective details
of such experiences? This book explores
psychosis as knowledge cut off from history,
truth that cannot be articulated in any other
form. Delusion is a new language made of
'incandescent alphabets' that the psychotic
adopts from imposed voices. The psychotic uses
language in a singular way to found and explain a

strange experience that he or she cannot exit.
Through the exegesis of language in psychosis
based on first person accounts, the book orients
readers to an enigmatic Other, pervasive and
inescapable, that will come to inhabit every
aspect of the psychotic's being, thought and
bodily experience. The book deploys a poetics as
a form of inquiry to give a nuanced picture of
delusion as a repair of language itself, following
Freud and Lacan-in historic and contemporary
forms of psychotic art, writing and speech.

Otis Dooda-Ellen Potter 2013-06-04 HARDY-HAR-HAR! Meet Otis Dooda. Yes, that's his name. Go on and have a good laugh. He's heard it all before. He's been called things like Otis Poopy Stink and Otis Toilet Twinkie. That's right, yuck it up and get it out of your system. We'll wait. All right then. This is the story of Otis and the Dooda family (including their rat named Smoochie) moving to New York City, and the incredibly strange, but true, things that happened to them. It all started with Otis getting cursed by a gey in a potted plant in their apartment building lobby, and then meeting a bunch of their neighbors, including a farting pony named Peaches who was disguised as a dog. And that was just the first day.

Run for the Wall-Raymond J. Michalowski 2001
Run for the Wall is a highly readable

ethnographic account of this remarkable American ritual. The authors, themselves motorcyclists as well as Run participants, demonstrate that the event is a form of secular pilgrimage. Here key concepts in American culture-- "freedom," and "brotherhood," for example--are constructed and deployed in a variety of rituals and symbols to enable participants to come to terms with the consequences of the Vietnam war. While the focus is the journey itself, the book also explores other themes related to American culture and history, including the nature of community, the Vietnam war, and the creation of American secular ritual.

Best in Show- 2020-02-04 Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and

their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

An Environmental Study of Artisanal, Small, and Medium Mining in Bolivia, Chile, and Peru-Gary McMahon 1999-01-01 "Mining exploration investment in the Latin American and Caribbean region has increased 130 percent in the last five years, a figure which increases to 500 percent, if Chile is excluded." Governments have revamped mining legislation to enable private investment while becoming more sensitive to environmental factors. In light of this legislation, this report examines the environmental effects of artisanal, small, and medium mines in three Latin American Countries: Bolivia, Chile, and Peru. Four of the most important elements to be considered are: □ The age of the mine □ Management of tailings □

The heterogeneity of the artisanal and small mine sectors □ The increasing need to take cultural considerations into account in the decision making process. The paper contains results of the studies on the various mining sectors, strategy and policy recommendations, and country study summaries.

Gazing on His Face-Ryan, Robin, CP 2020
Reflects on some traditional christological titles, using them as windows through which to gaze on the inexhaustible mystery of the crucified and risen Jesus. Each window provides some insight into a dimension of the person of Jesus and his life-giving action in our lives.

Explorer Repair Manual-Ford Motor Company of Australia 1996 On board diagnostics. 1997 model year (UN) Explorer. Related to the Ford Explorer repair manual (Part no. WM312). The 1997 service manual provides information covering emissions for 1997 Ford Motor

Company trucks. Complete emissions related diagnostic procedures for all affected systems or components that are affected are covered in this manual. The descriptions and specifications contained in this manual were in effect at the time this manual was approved for printing.

Yamaha ATVs Timberwolf, Bruin, Bear Tracker, 350ER and Big Bear-John Haynes 2010-08-01 Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.

Autonomous Flying Robots-Kenzo Nonami 2010-09-15 The advance in robotics has boosted the application of autonomous vehicles to perform tedious and risky tasks or to be cost-effective substitutes for their - man counterparts. Based on their working environment, a rough classification of the autonomous vehicles would include unmanned aerial vehicles (UAVs), - manned ground vehicles (UGVs), autonomous underwater vehicles (AUVs), and autonomous surface vehicles (ASVs). UAVs, UGVs, AUVs, and ASVs are called UVs (unmanned vehicles) nowadays. In recent decades, the development of - manned autonomous vehicles have been of

great interest, and different kinds of autonomous vehicles have been studied and developed all over the world. In particular, UAVs have many applications in emergency situations; humans often cannot come close to a dangerous natural disaster such as an earthquake, a flood, an active volcano, or a nuclear disaster. Since the development of the first UAVs, research efforts have been focused on military applications. Recently, however, demand has arisen for UAVs such as aero-robots and flying robots that can be used in emergency situations and in industrial applications. Among the wide variety of UAVs that have been developed, small-scale HUAVs (helicopter-based UAVs) have the ability to take off and land vertically as well as the ability to cruise in flight, but their most important capability is hovering. Hovering at a point enables us to make more effective observations of a target. Furthermore, small-scale HUAVs offer the advantages of low cost and easy operation.

Batman: Talking Bust and Illustrated Book-

Running Press 2016-02-09 This kit of iconic Super Hero BATMAN includes a 3-1/2" Batman bust with 10 different sound bites from the Dark Knight himself. Also included is a 48-page book on Batman with full-color illustrations throughout. Replaceable batteries included.

Subaru Impreza WRC Rally Car-Andrew van de Burgt 2017-11-15 The Subaru Impreza first appeared on the World Rally scene in 1993, taking a hat-trick of World Rally Manufacturers' Championships, in 1995, 1996 and 1997. The drivers the likes of Marku Alen, Ari Vatanen, and Colin McRae have competed in the World Rally Championship in Imprezas and all went on to winning the World Rally Drivers' Championship in Imprezas. These cars continued to compete on the World Rally stage until the end of 2008, when the Subaru World Rally Team unfortunately withdrew from rallying. This brand new Haynes Manual covers one of the most iconic rally cars in recent years, and does so in perfect detail. People that love the Impreza, really love the

Impreza, so get the full facts and specs now!

Pictorial History of Japanese Motorcycles-
Cornelis Vandenneuvel 1997 This is the story of
the Japanese motorcycle industry which started
from scratch after World War II and grew to
make most of the motorcycles in existence today.
It is told in a decade-by-decade narrative
treatment commencing in the early 1950s and
running through to the 1990s.
